PROFESSIONAL SUMMARY

Results-driven Computer Science undergraduate (B.Tech in Cloud Computing & Automation, CGPA 8.5/10) and Full Stack Software Developer with hands-on experience building and deploying production-grade web applications using Node.js, React, TypeScript, Go, PostgreSQL, and Docker. Skilled in designing scalable REST APIs, real-time systems (WebSockets, Redis Pub/Sub), secure authentication (JWT, RBAC), and payment integrations (Razorpay). Strong foundation in Data Structures & Algorithms (500+ problems solved) and cloud/DevOps fundamentals on AWS. Seeking a Software Development Engineer / Full Stack Developer internship to deliver reliable, high-impact software.

TECHNICAL SKILLS

Programming Languages: Java, C++, Python, Go, JavaScript, TypeScript, SQL, HTML5, CSS3
Backend Development: Node.js, Express.js, Go (Fiber), FastAPI, REST APIs, WebSockets, Redis Pub/Sub, Bun, JWT, RBAC
Frontend Development: React.js, Vite, Tailwind CSS, Framer Motion, CSS Modules, React Router, Progressive Web Apps (PWA)
Databases: PostgreSQL, MySQL, MongoDB, Redis, Supabase, Amazon DynamoDB
Cloud & DevOps: AWS (EC2, S3, DynamoDB), Docker, Docker Compose, CI/CD, Vercel, Linux, Git, GitHub
Tools & Platforms: Razorpay, Firebase Cloud Messaging (FCM), EmailJS, Supabase, VS Code, IntelliJ IDEA, macOS, Windows
Core Competencies: Data Structures & Algorithms, OOP, System Design, Problem Solving, Debugging, Agile Teamwork

EDUCATION

Vellore Institute of Technology (VIT Bhopal) Expected Graduation: Sept 2028
B.Tech in Computer Science, Specialization in Cloud Computing and Automation CGPA: 8.5 / 10.0
Relevant Coursework: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming, Cloud Computing Tools & Services, AI Agents, Unix Tools and Scripting

Khelgaon Public School, Prayagraj — CBSE Class XII May 2023

PROJECTS

VIT Live — Real-Time Campus Engagement Platform Personal Project | github.com/yasharyan90/vit-live
Tech Stack: Go (Fiber), React 19, TypeScript, PostgreSQL, Redis Pub/Sub, WebSockets, Razorpay, Tailwind CSS, Framer Motion, PWA
• Architected a full-stack real-time platform with 5-role Role-Based Access Control (RBAC), live announcements, emergency alerts, polls, and club feeds using WebSockets and Redis Pub/Sub, achieving sub-second message delivery.
• Integrated Razorpay payments with HMAC-SHA256 signature verification, QR-code event ticketing, and live attendee check-in.
• Implemented JWT authentication with rotating refresh tokens, OTP verification, anonymous polling, audit logging, and CI-tested REST APIs.
• Developed an installable React PWA with offline support, Firebase Cloud Messaging push notifications, admin dashboard, scheduled publishing, and S3-compatible object storage across a 13K+ LOC monorepo.

Aurum Luxury Boutique — Full Stack E-Commerce Platform Personal Project | Production Deployed
Tech Stack: React.js, Supabase, PostgreSQL, Razorpay, EmailJS, CSS Modules, React Router, Vercel
Live Demo: <https://aurum-luxury-ecom-store-main-store-six.vercel.app>
• Built and deployed a production e-commerce platform with dual authentication (customer and owner RBAC) secured through Supabase Row Level Security (RLS) and JWT.
• Integrated Razorpay payment gateway with automated GST calculation, processing real transactions with EmailJS order confirmations.
• Implemented Supabase Realtime for live order tracking, reflecting status updates in the customer dashboard within 2 seconds of owner action.
• Designed a responsive dark-mode UI with dynamic skeleton loaders, and added customer wallet and coupon services to improve retention.

Unified Health Intelligence Platform (UHIP) — Cloud-Native Healthcare Platform Team Project
Tech Stack: Docker, Docker Compose, Node.js, Express.js, React, Vite, PostgreSQL, MongoDB, FastAPI
• Led containerization and Docker-based deployment of a multi-service healthcare platform comprising React, Express.js, FastAPI, PostgreSQL, and MongoDB microservices.
• Configured service orchestration, container networking, persistent volumes, and environment variables via Docker Compose.
• Performed system debugging, integration testing, and deployment analysis to improve reliability and performance; awarded S Grade and presented at the College Project Exhibition.

CERTIFICATIONS & ACHIEVEMENTS

- **Applied Machine Learning in Python** — University of Michigan (Coursera): Predictive Modeling, Scikit-Learn.
- **Cloud Computing and Distributed Systems** — NPTEL, IIT Kanpur (Elite + Silver, 78%): Virtualization, Scalability.
- **Introduction to Internet of Things** — NPTEL, IIT Kharagpur (Elite, 77%): IoT Architecture, Embedded Systems, Protocols.
- Solved **500+ Data Structures & Algorithms problems** on LeetCode and GeeksforGeeks; following Striver's A2Z DSA Sheet.
